Share-A-space[®] certified for Windows Server 2008[™]!

Share-A-space[®] from Eurostep has become one of the first 50 software applications in the world to pass the extensive tests demanded by Microsoft and is now certified for Windows Server 2008[™]. Share-A-space[®] 6.0 uses the latest technology from Microsoft and is based on .NET Framework 3.5. Share-A-space[®] 6.0 is also approved for 64-bit operating systems.

“We are proud to be on the list of early adopters and the extended cooperation with Microsoft has proven very valuable. We have put a lot of effort into this and the investment has already started to pay off,” says Tobias Holm, manager of Share-A-space[®] development at Eurostep.

“Microsoft and Eurostep have a great value proposition for any PLM user looking for innovation leadership,” says Håkan Kårdén, CEO Eurostep Group. He adds: “In 2007 our license revenue increased by 60% and we forecast a significant growth in 2008. We need, therefore, to maintain high quality standards in both the installation procedures and ease of maintenance of Share-A-space[®] at customer sites. This certificate proves that we have reached an important milestone and that Share-A-space[®] is well positioned as the premium software for real PLM in the extended/virtual enterprise.”

“Microsoft’s PLM mission is to enable people in the global manufacturing industry to anticipate, innovate, and accelerate delivery of world-class products and services through enhanced collaboration, knowledge management and business intelligence. The certification of Share-A-space[®] demonstrates Eurostep’s commitment to deliver top-of-the-line PLM solutions using the latest technologies from Microsoft. We certainly look forward to an extended cooperation with Eurostep in supplying Engineering Business Intelligence solutions based on Share-A-space[®],” says Günter Rester, Director Manufacturing Industries - PLM solutions, Microsoft.

About Eurostep:

Eurostep delivers software and consulting services for product life-cycle management with a particular focus on the exchange and sharing of data within and between enterprises. Services range from pre-studies to the implementation of systems. The flagship product, Share-A-space[®], (www.share-a-space.com), is a software that supports collaborative engineering across the life cycle of products. Eurostep has subsidiaries in Sweden, the UK, Finland, France and the US and has blue-chip customers in a variety of industries including automotive, aerospace, defence, telecom, building & construction, and process industries.

Eurostep Group has been an international venture from the start in 1994, and all subsidiaries have access to the leading edge PLM knowledge base in Eurostep group.
