### **Share-A-space® 6.0 released**

**Eurostep announces the release of version 6.0 of Share-A-space®, the software application for managing product data across the full product life cycle, within and between companies in an extended enterprise.**

“With the release of Share-A-space® 6.0 we have taken our server solution to a new level of maturity and stability”, says Mattias Johansson, Director of Software Products at Eurostep.

The major extension of functionality in Share-A-space® 6.0 includes the addition of two important business objects: the requirement object and the breakdown object. These new objects improve the capability in Share-A-space® to manage information related to systems engineering activities.

New functionality enhancing server security has been added, for instance required password complexity together with expiration and encryption features.

Significant improvements have been made to the installation and management procedures. The aim has been to streamline the procedures and thereby the ease of use as much as possible.

Last, but possibly the most obvious change in Share-A-space® 6.0: The user interface has been updated in line with the new graphical profile for Share-A-space®.

*About Eurostep:*

*Eurostep delivers software and consulting services for product life-cycle management with a particular focus on the exchange and sharing of data within and between enterprises. Services range from pre-studies to the implementation of systems. The flagship product, Share-A-space<sup>®</sup>, ([www.share-a-space.com](http://www.share-a-space.com)), is a software that supports collaborative engineering across the life cycle of products. Eurostep has subsidiaries in Sweden, the UK, Finland, France and the US and has blue-chip customers in a variety of industries including automotive, aerospace, defence, telecom, building & construction, and process industries.*

*Eurostep Group has been an international venture from the start in 1994, and all subsidiaries have access to the leading edge PLM/PLCS knowledge base in Eurostep Group.*
